## | 2.2 Label setup
Automatic label identification:

● Load no less than 4 consecutive labels into the printer.

● After the paper is stable, press and hold feeder button, until you hear a beep.

● Then, the printer will automatically label identification.
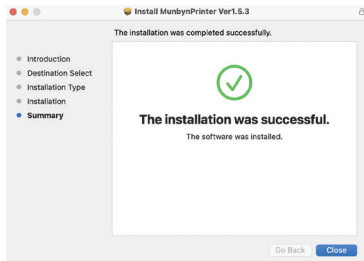

❘ 2.3 Driver installation

For the latest driver, please visit:
www.munbyn.biz/941d

- Please run the downloaded software from the web address indicated above and follow the prompts to complete installation.

2.3.1 Windows Driver Installation
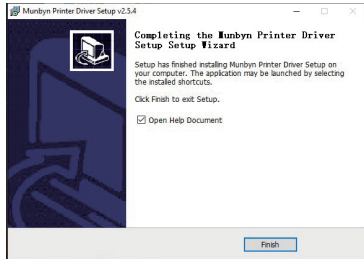

2.3.2 Mac Driver Installation

03 Pro Tips

- **Anytime you change your label**, run the automatic label identification.

- Press the feeder button on the printer to **skip a blank label**.

- **To run a self-test**, press and hold the feeder button until you hear two short beeps.

- **Avoid poor quality labels** as they can damage the printer.

- Regularly **clean the printer head**.

- **If the paper is jammed and the red light flashes**, run Automatic label identification.

- Insert Munbyn into the **same USB port** on your computer every time. This will avoid creating duplicate copies of the printer in your operating system..
